

## **Kristina Hakobyan**

My career in the domain business started in 2010. It was completely new to me being involved in the field of the domain registration services.

My communications with professionals and investigations in that area helped me to understand all details. It was not a short-time period but it was worthy the time I spent on it. Currently I work in Global AM LLC. Our company is an accredited registrar in .am and .huj zones.

Since Oct 2016 till November 2017 I have been managing GlobalR.com project.

It provides registry gateway service for .am and .ge zones all over the world. Now I am busy with ccTLD integrations to the GlobalR.com platform.

I am the member of Internet Society and Internet Society Armenia chapter since 2015.

**October, 2017** I have participated as a Fellow to ENOG14, in Minsk, Belarus.

**November, 2017** I have participated as a Fellow to RIPE NCC IPv6 Hackathon, in Copenhagen, Denmark.
