

## **Alan Greenberg**

Alan Greenberg has over fifty years of experience with computing and networking technologies. For much of his career, he worked for McGill University in Montreal, Canada. Over the years, this included software design and development, education technology support, management and policy development. He was one of a handful of people who brought the Internet and its predecessor networks to Canada and worked on a variety of Canadian and international networking initiatives. He has taught courses in computer architecture and design, as well as managed the Internet Society (ISOC) workshops which taught personnel from 150 developing countries how to build, support, manage and use the Internet in their countries. He was also an elected member of the ISOC Board of Trustees from 2001-2004.

After his retirement from McGill, he continued to focus on the effective use of technology in developing countries. Projects included how to effectively spread the use of technology to benefit the country and its people; and a study of the linkages between technology and poverty, and how technologies can be effectively used for poverty alleviation, and how web and specifically mobile technologies can benefit developing populations.

Throughout his career, he has focused on how technology can be made accessible to the widest possible audience and the empowerment of people through the use of technology.

Alan has worked with ICANN and At-Large since 2006. He has served on the ALAC for a total of 10 years, acted as the ALAC Liaison to the GNSO for 8 years and held the position of ALAC Chair for 4 years. While serving in these roles, he spearheaded ICANN policy development initiatives related to gTLD domain name registration and protecting registrant rights as well as on multiple other policy development groups. He served on the Accountability and Transparency Review Team in 2013, chaired

the RDS-WHOIS2 Review Team and was an active participant of the IANA Stewardship Transition and ICANN Accountability Cross-community work groups. He has been actively involved in ICANN GDPR implementation since mid-2017 and is an ALAC-appointed member of the GNSO Expedited PDP on the GDPR implementation.

In addition to his work with ICANN, he volunteers his time helping reunite families and is a professional genealogist.

Alan holds a BSc degree in Mathematics and Physics, and an MSc in Computer Science, both from McGill University.
